Slides

This content walks you through the process on how to launch your Vocareum lab environment from Databricks Academy and how to enable pop-ups from Databricks Academy.

ILT Lab Environment: Introduction to Python for Data Science and Data Engineering

LTI

Session instructors

1 Instructor

Louis Frolio

Course description

This course is intended for complete beginners to Python to provide the basics of programmatically interacting with data. The course begins with a basic introduction to programming expressions, variables, and data types. It then progresses into conditional and control statements followed by an introduction to methods and functions. You will learn the basics of data structures, classes, and various string and utility functions. ...
